FOR IMMEDIATE RELEASE

September 28, 2018

Nathan Dennis Joins R&M's Environmental Services Group

Nathan Dennis joins **R&M CONSULTANTS, INC.** (R&M) as an Environmental Specialist in our Environmental Services Group. He will be responsible for ongoing regulatory compliance, permitting, environmental baseline monitoring, Phase I and II environmental site assessments (ESA), general contaminated sites work, NEPA impact analysis, SWPPP implementation and other related environmental services in support of highway, street, airport, site development, waterfront and other infrastructure projects.

"Having additional staff support for the Environmental Group and Earth Sciences Department will greatly enhance our capabilities," says R&M's Group Manager of Environmental Services Kristi McLean, LEED AP BD+C, CESCL. "Nathan comes from the State and will be able to use his experience with Alaska regulatory requirements to increase efficiency, particularly with permitting tasks."

Nathan's experience includes gathering environmental baseline data, Phase I and II ESAs, storm water management and field environmental services. He previously worked for the Alaska Department of Fish & Game where he was involved with numerous fish habitat preservation and erosion mitigation projects. Nathan's work there included gathering environmental baseline data to assist with erosion mitigation on the Talchulitna River; reviewing and editing EIS documents for the Kasilof River; and conducting fish sampling, counting and other relevant environmental baseline data about the salmon run in the Judd Lake fish weir. He also compiled ESA Phase I information and dealt with regulatory permitting restrictions for land use in that area. Since joining R&M, Nathan has supported environmental efforts for the Interior Alaska Veterans Cemetery, UAA Campus Well Permitting, Port of Alaska and Alaska Aerospace Corporation Environmental Assessment Reevaluation.

"I've heard nothing but good things about R&M and would love to stay here long-term." says Nathan. "I look forward to seeing the firm grow, as well as personally growing in my career along with the firm."

Nathan has a B.S. in Environmental Science from the University of Idaho. A born and raised Alaskan, he spends his free time enjoying the numerous outdoor activities the state has to offer, such as fishing, hiking and biking. Also an avid skier, Nathan spent the winter after graduation chasing snowstorms to ski resorts across the U.S. He has traveled around the world and looks forward to more global adventures.

Founded in Alaska in 1969, R&M offers civil, structural, geotechnical and waterfront engineering; surveying and mapping; GIS services; geology; hydrology; environmental services; transportation and land use planning; public involvement; right of way and lands consulting services; construction administration; materials testing; and special inspection. R&M has offices in Anchorage and Fairbanks.
