Coffman Engineers' Celebrates Successful Interns

ANCHORAGE (August 6, 2021) – Coffman Engineers (Coffman) is proud to celebrate and congratulate our 2021 engineering interns for a year of successful internships across several engineering disciplines.

Coffman's outstanding interns this year include Tommi Crist, who is a civil engineering ANSEP student at University of Alaska Anchorage; Jude Gabriel, an electrical engineering student at University of Portland; Benjamin Bitler, a mechanical engineering student at Montana Tech; and Austen Eriksson, a mechanical engineering student at Montana State University. Each of these aspiring engineers are Alaskan's pursuing engineering excellence. During their internship at Coffman, they have gained practical engineering experience while being positive contributors to the team.

Each year, Coffman hosts summer interns to provide support to all of our engineering disciplines. Many of our summer interns have accepted full time positions at Coffman after graduating college. Coffman's internship program has proven to be an excellent way for the firm to get extra support during busy summer months while providing interns with real world engineering experience.

Coffman wishes all our 2021 interns all the best as they finish their degrees and begin their careers in the coming years.

About Coffman Engineers

Since 1979, Coffman Engineers has added staff and expanded into dozens of service offerings, but the commitment to innovative work and enduring relationships remains unchanged. Coffman offers deep and scalable multidiscipline engineering services including civil, structural, mechanical, electrical, fire protection, and other specialties. Coffman's more than 600 employees from 17 offices across the U.S. are committed to clients and the team effort it takes to build a better world. For more information, please visit coffman.com or connect on LinkedIn, Facebook, Instagram, and Twitter.
